

OHBA Update – *from EO Vince Squillace*

The phone keeps ringing and the texts continue. As of today, we have learned about the construction moratorium in Pennsylvania. We checked in with our sources at the governor’s office and key legislators as well my counterpart at the AGC who communicates with some of the same folks I do.

So far (10 am) nothing similar is planned here. But please keep in mind, this is the most fluid situation I’ve experienced in over 40 years. We must all be prepared for possible disruptions. Not even sure if we will be given the opportunity to comment on any drastic action. Nonetheless, David Heller of the NRP group was gracious enough to send us his company guidelines in place to help deal with the current health scare on construction sites. We have placed it on our web page and facebook – www.ohiohba.com

My phone is with me at all times. If something of concern occurs, we will let you know. Likewise let us know of any developments in your area. *Vince Squillace 614-361-8096*
